CONNECTIVITY AND COMMUNICATIONS

Providing high-speed ubiquitous basic connectivity products, cloud-network integrated premium network services, global intelligent network services as well as platform- and scenario-based intelligent connectivity services

Government and enterprise network: Unicom Cloud resources covered >230 cities

International network: 660,000 kilometers of international submarine cables

No. of mid-band 5G base stations: >1.21 million

Broadband network: maintained industry edge in Northern China, while foundational capabilities in Southern China were markedly boosted

COMPUTING AND DIGITAL SMART APPLICATIONS

Deeply integrating digital technologies to provide information services such as computing, data, application, security, etc.

Unicom Cloud revenue increased by 41.6% year-on-year, reaching RMB 51 billion

Data services revenue growth: 32%

30,000 5G industry application projects covering 71 major categories of the national economy

Cybersecurity revenue growth: 120%

MARKET CONVERGENCE

Leveraging the advantages of "integrated capabilities and operating services" to tap into both consumer and government-enterprise markets

Mobile subscribers increased by 10.60 million, reaching 333 million

Broadband subscribers increased by 9.79 million, reaching 113 million

Serving >1,000 medical clouds and >800 smart city districts and counties

No. of 5G virtual private network service customers: 8,563 (up by 125% year-on-year)

CAPABILITY FUSION

Using digital technologies to transform and upgrade traditional industries to empower cost reduction and efficiency enhancement

No. of patents granted reached 2,287 (up by 37% year-on-year)

Technological innovation personnel ratio: 40%

Accelerated the deployment in the nascent AI industry, and launched the "Yuanjing" LLM system

Digital Village platform covered >250,000 administrative villages
